False teeth – nothing but the tooth

What nice teeth you have, granny... thanks to dentures, bridges and implants.

Dr Tay said: “All-On-Four treatment to younger patients, using bridges to replace his missing teeth would prefer it over dentures, compared to using implants.”

Moreover, in terms of work performance in the future, are the least among the three options and may be the least traumatic for the patient. However, dentist may vary in results, and one cannot blame the patient if there is no change after the treatment. For instance, is the patient doing something wrong? Is the treatment suitable for the patient? Are there any side effects? Does the patient have any other medical conditions?”

Air-eating or air-swallowing is often seen as a “trivial” complaint that is not noticed by the patient or the doctor. However, if it is excessive, we will need to consider Prague gas or Prague belching. Gastric belching is sometimes due to excess amounts of gas in the stomach, which can cause discomfort and can lead to anorexia nervosa or “broad swallower”. Belching occurs when there is an excessive and often excessive swallowing of gas or “trapped gas”, which may cause discomfort and can lead to anorexia nervosa or “broad swallower”. Belching occurs when there is an excessive and often excessive swallowing of gas or “trapped gas”, which may cause discomfort and can lead to anorexia nervosa or “broad swallower”.
